

## **Blue Lagoon Receives First Delivery of Blasting Material at Dome Mountain, Underground Mining Commences**

**September 25, 2025 – Vancouver, British Columbia – Blue Lagoon Resources Inc.** (“Blue Lagoon” or the “Company”) (CSE: BLLG; OTCQB: BLAGF; FSE: 7BL) is pleased to announce a major milestone in its transition to production at the Dome Mountain Gold Project, located near Smithers, British Columbia.

The Company has received its first delivery of blasting material on site, and completed its first underground blast, officially starting active mining operations. This marks the official commencement of mining activities at Dome Mountain, one of only nine mining projects in British Columbia to receive a mining permit since 2015.

“Today is a historic day for Blue Lagoon and all of our stakeholders,” said Rana Vig, President & CEO of Blue Lagoon Resources. “With the arrival of our first blasting material, and the successful completion of our first underground blast, mining at Dome Mountain has officially begun. This milestone is the culmination of years of hard work by our team, our partners, and the local communities, and it positions us to generate near-term cash flow while continuing to explore Dome Mountain’s district-scale potential, all without further dilution.”

Underground development and blasting will initially focus on accessing high-grade zones previously defined by drilling and sampling. In the coming days and weeks, mined material will be transported to Nicola Mining Inc. under the Company’s toll milling agreement, ensuring a quick and efficient path to gold concentrate sales and near-term cash flow.

This step follows the recent commissioning of Dome Mountain’s state-of-the-art Water Treatment Plant, built to meet all regulatory discharge standards and capable of treating up to 400 liters per minute - more than six times the current required capacity. Together, these recent achievements underscore Blue Lagoon’s readiness as it responsibly advances Dome Mountain into gold production.

### **About Blue Lagoon Resources Inc.**

Blue Lagoon Resources is a Canadian based publicly listed mining company (CSE: BLLG; FSE: 7BL; OTCQB: BLAGF) focused on building shareholder value through the aggressive development of its 100% owned Dome Mountain Gold project. The Company is run by professionals with significant finance and mining experience and operates within a prime mining jurisdiction in British Columbia, Canada. With the granting of a full mining permit, a key milestone

achieved in February 2025 - one of only nine such permits issued in British Columbia since 2015 - Blue Lagoon is now focused on a safe and secure opening of the Dome Mountain Gold Mine and starting gold production. The Company's primary objective has always been to become a cash-flowing mining company, to ultimately deliver tangible monetary value to shareholders, state, and local communities.

The Company is not basing its production decision at Dome Mountain on a feasibility study of mineral reserves demonstrating economic and technical viability. The production decision is based on having existing mining infrastructure, past bulk sampling and processing activity, and the established mineral resource. The Company understands that there is increased uncertainty, and consequently a higher risk of failure, when production is undertaken in advance of a feasibility study.

*Statement Regarding Forward-Looking Information: This release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address events or developments that Blue Lagoon Resources Inc. (the "Company") expects to occur, are forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "targets", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential", "mine", "production" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include results of exploration activities may not show quality and quantity necessary for further exploration or future exploitation of minerals deposits, volatility of gold and silver prices, delays in mine development activities, future cash flow expectations and continued availability of capital and financing, permitting and other approvals, and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Forward-looking statements are based on the beliefs, estimates and opinions of the Company's management, contractors and consultants on the date the statements are made. Except as required by applicable securities laws, the Company undertakes no obligation to update these forward-looking statements in the event that management's, contractor's and consultants' beliefs, estimates or opinions, or other factors, should change.*
